

Town Booming Helps

VI.—How Is Your Front?

A frontless man is an "also ran," but the man with the front, he gets there!

The author of this poem is unknown.

He wasn't strong on versification, but he was long on horse sense. He knew that the winners in life are the ones that put up the best front.

It's just the same with a town. IT MUST HAVE A FRONT. Everybody living in it or doing business in it should boost at all times and in every place.

One of the best ways to boost is to boom your own business by EVERY KIND OF ADVERTISING.

THAT IS PROFITABLE. Other people will realize that you are living in a live town and move in.

We are doing what we can to put up a front for our town. Lend a hand, or better still, let us help you do it.

The right kind of stationery will help your business front and the front of the town.

DON'T BE AN "ALSO RAN" in your business. Don't let your town be classed "among those mentioned." When a new business or the opening of a new factory is under discussion get up to the front.

Arranging and repairing business fronts is our specialty.

HOW IS YOUR FRONT?

Dr. "Nat" Burwell Married

Miss Loraine Turner, daughter of Mr. and Mrs. H. M. Turner, of Shepherdstown, and Dr. Nathaniel Burwell, formerly of Clarke county, but now practicing his profession in Shepherdstown, were married at that place last Wednesday at noon.

The wedding was a very quiet one, only members of the two families and intimate friends being present.

The ceremony was performed by Rev. C. H. Rockey, of Waynesboro, Va., who was formerly Mrs. Burwell's pastor.

The groom is a son of the late Dr. Philip Burwell, of Millwood, and his mother was Miss Maria H. Harrison, daughter of Mr. Henry Harrison, and he is closely connected with the oldest and most prominent families of Virginia.

Foley's Honey and Tar cures the air passages, stops the irritation in the throat, soothes the inflamed membranes, and the most obstinate cough disappears. Sore and inflamed lungs are healed and strengthened, and the cold is expelled from the system. Refuse any but the genuine in the yellow package. J. C. Jones & Co., Millwood, R. C. Green, Boyce, Va.

Barlow & Wilson's Minstrels

The local theatre-goers will have an opportunity of seeing Barlow & Wilson's celebrated New York minstrels. The show given by these high class artists is said to be the best on the road this year and judging from the flattering press notices the company has been receiving all over the country, their show equals that of any touring the south. The minstrel band gave a street parade and concert today that is deserving of special mention. Company is a large one. Opera House, Saturday, October, 16. Prices 25c, 35c, 50c.

Other Creameries

Letters of inquiry written to others towns in which Creameries have been built by the same company which proposes to build the Berryville Creamery, have elicited most favorable replies.

The Creamery at Chrisney, Indiana, has been in operation between seven and eight years. Jones & Bancroft filled their contract to the letter. Average price paid farmers for butter has been 30 cents. Always have ready sale for all we can make. It is the best thing a small town can possibly secure. Brings money to town every month; brings farm land to a higher state of cultivation; improves stock of cattle; raises price of farms. Banks deposits increase. This Creamery averages 500 pounds of butter per day, and sold every pound of it. Have inquiries for larger output.

Creamery at Charleston, Indiana, built and equipped by Jones & Bancroft in 1905. Found them reliable in every respect. We have paid on an average of 29 cents for butter fat, but price will be higher this year. Buyers are falling over each other to secure our output. We have paid each year 8 per cent on capital, and had \$1,800 in treasury at close of business December 31, 1908, over and above dividends.

Creamery at Dover, Kentucky, built by Jones & Bancroft two years ago. Has been a success from the start. For butter fat delivered in August, paid 30 cents; same for September. Find a ready sale for the product; in fact, cannot supply all calls. Had to refuse an order for 500 pounds weekly within past few days. Patrons are all well pleased, and want to put in more cows. Last year we earned 15 per cent; set aside 5 per cent and paid 10 per cent on stock. The plant has been a benefit to the farmer and also to the town, putting much new money into circulation. It has been a good thing for our community, and will prove a good thing for any good grass country.

Creamery at Farmville, Va., built this year. Owners are satisfied with their investment and feel sure they have made no mistake in dealing with Jones & Bancroft. All farmers pleased; getting new patrons every month, and losing none. Our Creamery has been in operation too short a time to show from statistics that business is benefited, but it stands to reason that any business which creates a market at home for farm products is a benefit to the community at large as well as to the individual farmer. Found no difficulty in selling all the product. The business will be a good thing for your section of the country.

The above are actual quotations from letters written to Cashier John B. Neill, of the Bank of Clarke County, in answer to his request for information; and they present strong arguments for the Berryville Creamery.

Nice Home for Mrs. Louthan

Mrs. John K. Louthan is erecting a nice nine-room residence opposite the Berryville High School, and, when completed, it will be one of the most modern cottages in the town, equipped with every convenience.

Pulliam Brothers, the well-known contractors, are in charge of the work.

Special Notice.

Intending to make a change in my business, I request all persons indebted to me to come forward at once and settle same.

All accounts not settled within 60 days will be placed in the hands of an officer for collection.

W. H. MORELAND.

The Creamery

We are pleased to see our business men and farmers subscribing for shares of stock in the proposed Creamery. One-half of the total shares have been subscribed for, and if enough others will do likewise when approached on the subject, Berryville will soon have a modern and up-to-date Creamery in operation.

As to the value of a Creamery for Berryville and vicinity, a glance at the Dairy Statistics of Wisconsin should convince anyone that it will be a good thing for this town.

It will be seen that the Dairy Products bring in more money annually than the wheat, corn or oats.

"Wisconsin's census bureau places the number of butter and cheese factories in the state at 2,444. Of these 926 are butter factories and 1,518 are cheese factories. The number of milk cows is placed at 1,237,910 and their valuation at \$30,784,377. Valuation of dairy products is placed at \$47,939,957. This valuation exceeds that of any other product in the state. The valuation of oats is placed at \$20,060,789, corn at \$16,916,926, wheat at \$25,444,823."

There are nearly 22,000,000 dairy cows in the United States or one to every three grown persons. They yield about 9,000,000,000 gallons of milk a year, the butter product is nearly 2,000,000,000 pounds of all grades, and the output of cheese is over 300,000,000 pounds. The cheese industry is making enormous strides. In a short time the output will be 1,000,000,000 pounds.

There is one item, a by-product, which is never alluded to when the cow is considered. Our gold production is about \$81,000,000 a year at present. This is a vast sum of money, yet the rakings of the cow yard are estimated to be worth in cold cash eight times as much, or \$648,000,000—New York Farmer.

In connection with the question as to what dairy farming does for the soil, we clip the following from Colman's Rural World:

"Lest the dairymen forget the important relation between dairying and fertility accompanied with the other branches of farming and live stock husbandry, we wish to call attention to some figures recently made public by the Ohio Experiment Station. According to these figures, when a man sells \$2 worth of straw from his farm he sells as much fertility, that is removes it from his farm, as he would sell in \$80 worth of butter. When he sells \$18 worth of oats he moves as much fertility from his farm as he would in selling \$355 worth of cream. In selling \$20 worth of wheat at 80c. per bushel he loses as much as though he had sold \$200 worth of cream. Some people will believe an argument like this when you are selling grain or hay from the farm, but they say there is very little difference in the effect upon fertility whether you keep cows or fatten steers or hogs, or in fact, practice any branch of live husbandry. The Ohio Experiment Station, however, is authority for saying that a man sells \$100 worth of beef at 5c per pound he removes as much fertility as he would in selling \$55 worth of butter also that when he sells \$100 worth of pork at 5c per pound he sells as much fertility as he would if he sold \$360 worth of cream. As a matter of fact in dairying, in the selling of butter or cream, very little fertility is removed from the farm. It is estimated that in selling a ton of butter no more than 50c worth of plant food is removed from the farm, and if the butter was absolutely clean and pure, there would be no none removed."

Both Boys Saved.

Louis Bonn, a leading merchant of Norway, Mich., writes: "Three bottles of Foley's Honey and Tar absolutely cured my boy of a severe cough, and a neighbor's boy, who so ill with a cold that the doctors gave him up, was cured by taking Foley's Honey and Tar." Nothing else is as safe and certain in results. J. C. Jones & Co., Millwood, R. C. Green, Boyce, Va.

To the School Teachers

We earnestly recommend that each and every white teacher of Clarke county attend the Teachers' Association at Boyce on Saturday of this week (October 16).

This Association, as its name implies, is for teachers, and not for any particular one. If you are not already a member, come and join, and my word for it, you will find help and encouragement in your work. Most assuredly we are not expecting too much from the teacher who has the right spirit in and for the cause, when we ask them to give one day in two months to these meetings. Some sacrifice is demanded in every vocation. Business of importance is to be transacted at this meeting, and we desire the presence and help of each white teacher. An interesting program has been arranged, and you will derive pleasure as well as profit if you attend.

C. G. MASSEY, Division Superintendent.

Barlow & Wilson's Minstrels

Barlow & Wilson's Minstrels hold forth at the Opera House, Saturday, October 16.

The date is auspicious, the company well known. Since the days of old when four of the best men in the United States formed a trust on minstrelsy, everything goes in the first rank that has Barlow, Wilson, Primrose or West's name to it. There are real sane-looking people who say they do not like grand opera, but nobody is willing to declare his dislike of a good minstrel show. Prices 25c, 35c, 50c.

Letter to J. Ed. Ogden

Berryville, Va.

Dear Sir: "He's very good man as men go, he's only about fifteen per cent tricky."

What do you think of that? There are eight pains not adulterated and full-gallon; there are more than two hundred in all; some adulterated three-quarters, some two-thirds, some half, one-third, a quarter, and, when you get down to fifteen per cent they seem very good as pains go; they're only about fifteen per cent tricky.

How much is it fair to cheat in a gallon, by measure, and how much by water in milk; or whitening, china clay, ground stone, barytes, benzine, and water, in paint? Fifteen in the least; it isn't worth while to cheat for less than fifteen; they seem to think so anyhow. Maybe, it isn't worth while at all.

Devote is the strongest of all. A gallon goes further. 10 gallons Devote is enough for a job that takes 11 12 13 14 15 16 17 18 19 20 21 22 of the rest; and a gallon costs \$5 when painters are paid.

Now reckon the costs. Devote \$30, the rest \$55 \$60 \$65 \$70 and so on. How long will they wear? The strongest wears longest, of course.

Is it worth while to cheat when an honest paint costs least and wears longest?

Yours truly

F. W. DEVOTE & CO.

To Lecture on Poe.

One of the most interesting and instructive lectures to be heard here during the present season will be that by Hon. R. Gray Williams, of Winchester, on "Edgar Allen Poe," which will be delivered at the residence of Hon. A. Moore, Jr., on Friday of this week (October 15) at 8 p. m., under the auspices of the Daughters of the Confederacy.

Mr. Williams is probably the most polished and intellectual speaker in this section of the State, and his appearance here always assures a large attendance.

An admission of 35 cents will be charged, which will include refreshments.

During the evening songs will be rendered by Miss May Wall and others.

Lost. \$5 Reward.

Making Over Old Furniture

Strength and money are not essential to making old furniture into new, but intelligence and patience are. To slowly remove paint and varnish so as not to destroy the surface of the wood is a tiresome and monotonous task. But good old pieces properly strengthened and restored are more attractive, and often more valuable, than any modern piece costing the same price.

It is frequently difficult to distinguish the condition of the wood itself, so abused by heavy coats of paint are many pieces found in out-of-the-way places and renovated at small cost. Provided the original lines are good, any piece will repay careful restoration. Usually a hard wood that will take any stain and high finish is found beneath the paint.

The reward for the labor necessarily expended, the strength used and the amount of time involved in restoring any article usually more than repays the one who is seeking to make the old furniture into new.—The New Idea Woman's Magazine for November.

"Joe" Savage Heavily Fined.

Joseph H. Savage, president of the Savage Distilling Company, of Kernstown, entered a plea of guilty in the Frederick County Circuit Court on Monday to the 23 indictments returned against him by the Grand Jury last week, and was fined \$50 on each count, making a total of \$1,150.

The costs of the case totaled \$315, which, with the fines, made his payment \$1,465.

The Winchester Star of Monday says:

"It was reported that steps would be taken to have Mr. Savage's license as a distiller revoked, but this was denied at the court house this afternoon. It was stated, however, that this conviction may be used against Mr. Savage should he make application for license next summer."

Monday, November 1, 8 p. m., Hon. Marshall McCormick, at Berryville.

Announcement.

Having been urged by many friends whose support and good will is highly appreciated, I hereby announce myself as an independent candidate for the House of Delegates from the counties of Clarke and Warren at the regular November election.

I respectfully solicit the support of every voter in the District, without reference to his past party affiliations, and pledge myself, if elected, to work for the best interests of all the people.

Any queries from anyone as to my position on any subject will be answered clearly and promptly.

Wounded by Step-Son.

Telegraphic reports in the daily papers of yesterday stated that James Johnson had been seriously wounded by his step-son, Carl Burkett, at his home at White Post on Saturday, Burkett firing a load from a shot-gun into Johnson's right breast.

It was also stated that Burkett made his escape immediately after the shooting.

Sheriff Levi and the COCHER tried unsuccessfully all yesterday afternoon to find out something about the case from White Post, no report having been made to the Sheriff, but up to a late hour yesterday nothing could be learned about it.

LATER—Early this morning Sheriff Levi received information that the facts, as above stated, are substantially correct. Burkett's movements since the shooting are being traced, and he will be given no chance to leave the State. Dr. W. R. Stuart says that, unless complications arise, Johnson's injuries are not serious.
